WORK EXPERIENCE

Associate Full Stack MERN Developer – Visor Dynamics Private Limited   June 2025 – Present
- Contributing to scalable MERN/Next.js applications with a focus on frontend architecture using modern libraries and frameworks. Actively involved in Docker-based containerization, improving deployment workflows and cross-environment consistency.

Intern MERN STACK Developer – Visor Dynamics Private Limited   Feb 2025 – May 2025
- Worked with Next.js, Docker, Prisma, and PostgreSQL to build scalable and efficient web applications. Focued on backend optimizations, API integrations, and containerized deployments to enhance performance and maintainability.

Frontend Developer – Fourth Industrial Revolution Inc. (4irinc)   July2024 – Sep 2024
- I worked as a Frontend Web Developer and participated in projects.
- Acquired valuable knowledge in web development, specifically with REACT JS, HTML CSS TAILWIND CSS, JS, to design and deploy templates and interactive Websites.

Frontend Intern – Digital Billing Services   Oct 2023 – Nov 2023
- Spread headed end-to-end development of web applications using React.js, optimizing UI components for seamless user experiences and integrating efficiently with backend
- Dmonstrating expertise in modern web development practices and a commitment to delivering polished solutions on time.

Freelancing   Aug 2022 - Present
Full-time Freelancer
- Created a Full Stack (MERN) Web Application for Project Managements in Colleges.
- Created a Module to convert text to speech, and speech to text using Reactjs in a Chat Web Application.

PERSONAL PROJECTS

- **FYP PORTAL (Final Year Project)**
  - Built an FYP Portal for seamless student-supervisor collaboration, allowing students to send supervision requests, with supervisors managing approvals and automated group formation to organize project teams efficiently.
  - Added features for group communication and meeting scheduling, including in-app chat and integrated Zoom meetings, creating a centralized space for teams to discuss projects and stay connected throughout their FYP journey
- **Git View**
  - A GitHub profile analyzer that uses the GitHub API to fetch and display detailed user statistics including total public repositories, open and merged pull requests, followers, starred repositories, programming languages used, and contribution history. It provides a consolidated overview of a developer's GitHub activity and project involvement
- **Real Estate MERN App**
  - A full stack MERN application where users can create, update, and view property listings with details such as location, price, images, and description. Includes authentication and database integration to manage user-specific listings.
